Ultrasound Blinds

Why More>Less by Ultrasound Blinds?

Bespoke shading at the touch of a button using the most advanced, easy-to-use technology on the market. Trusted by home and business owners for over 25 years, our systems are custom made to your specification and manufactured in-house by our innovative design teams. We are partners with only trusted suppliers who meet the demands of our customers, we source hardware and materials globally, guaranteeing the best shade products worldwide.

SOLACE

Extremely quiet motors operate your motorised shades with literally no disturbance.

FLEXIBILITY

Schedule your shades to open and close at particular times of the day with the option to adjust them at any point.

ACCESSIBILITY

Operate your window shades from the same devices that controls your lights, heating and audio.

AMBIANCE

Pre-programmed scenes move your blinds and curtains to create the perfect atmosphere.

SECURITY

Control your window treatments wherever you are to cleverly give the impression you are at home.

ENERGY SAVING

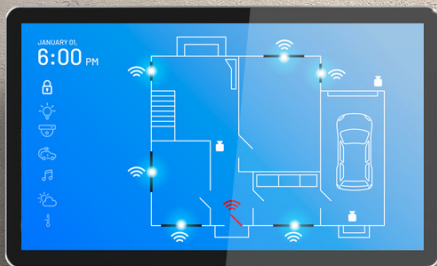

On warm days your blinds can close automatically to help avoid overheating, or on cooler days to prevent heat loss.

More>Less by Ultrasound Blinds - set your preferred scene

Specific scenes can be pre-programmed so at the touch of a button the blinds will adjust their position, along with lighting and audio system settings to create the perfect environment.

Ultrasound Blinds systems are compatible with:

Control4  rako 

 KNX

 CRESTRON

Seamless Interconnectivity

More>Less by Ultrasound Blinds offers advanced technology designed to integrate with all leading smart home and building management systems (BMS). It provides confidence to our customers to choose bespoke shading systems in the knowledge, that they will integrate seamlessly with all major automation systems. Built in, expert two-way communication ensures the most complex settings, including scenes, automatic sensors and voice control.

ROLLER SYSTEMS

Efficient and quiet, our Roller blind systems are the most technology driven solutions on the market. Customisation completes design and our smart control options seamlessly integrate into any building automation system.

SKYLIGHT SYSTEMS

Skylight windows installed with our shading systems, allows natural light to flow through any room in the best possible way. Our range of technical fabrics will provide essential sun protection from heat, glare and UV rays.

DIM-OUT SYSTEMS

For domestic or commercial use to offer total room-darkening in Conference and AV rooms, Medical areas and Bedrooms. The fabric is securely fastened into side channels with various hardware concealment options to eliminate light transmission.

VERTICAL BLINDS

This premium system is enhanced with features that make Vertical blinds a reliable solution for most applications, including shaped windows. Our new minimalist sewn-in bottom weights operate with precision and design.

PLEATED SYSTEMS

Our slimline Pleated blind systems has been re-developed to be installed into a wider variety of compact spaces including stylish bi-folding doors.

They provide the perfect balance between functional shading and decoration.

PANEL BLINDS

The concept of sliding Panels originated in Japanese cultural traditions. Elegant panels are perfect for today's large glazed areas - connected or unconnected, with fabrics that create high performing environments.

ROMAN BLINDS

Elegant Roman blind systems combine a classic soft furnishing appearance with modern components, to deliver shading that operates effortlessly. These traditional window treatments desires a beautifully customised finish with a personal touch.

CURTAIN SYSTEMS

Quiet, robust and stylish curtain tracks and poles, are perfect for hard-to-reach, large or heavy weight curtains. Tailor made draperies have an extensive style range with material choices, headings and finishes.

MORE > LESS

AUTOMATIC WINDOW SHADING

SIMPLE TO OPERATE

At the touch of a button you can open and close your blinds or use voice control and smart home devices.

ENERGY EFFICIENT

Prevent heat loss and save money on your energy bills with electric blinds that open and close automatically at preset times.

PRE-WIRED PROPERTIES

Easy and quick if your space is already set up for hardwired blinds or battery motor installations require no wiring.

CONSTANT POWER

Hardwired blinds are connected to the buildings power supply, so no need to recharge battery motors.

SAFETY

Automatic blinds remove the need for unsightly manual cords which makes them very safe for young children or pets.

SUITABLE FOR LARGE BLINDS

Our specialist motors offer an excellent power source for blinds that need to cover large windows and doors.

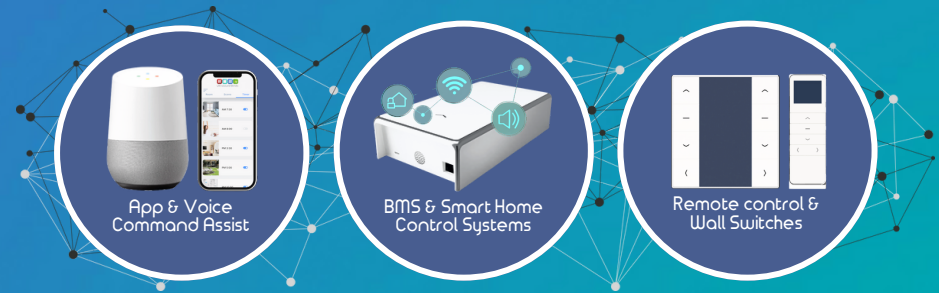

VIRTUALLY SILENT

Our motorised blinds are quiet from 31-43dB so you can operate the blinds without disturbing the peace and quiet.

SYMMETRICAL RISE & FALL

Motorised shades will open and close at the same speed creating symmetrical and graceful movement within your space.

Hard Wired
Power-supplied by plug
socket or fuse spur

Battery
Re-chargeable by mains
adaptor or Solar Panel

Ultrasound Blinds

Fabrics - much more than decoration

Our fabric collection sets itself apart by considering both the fabric's texture and technical features. We offer a wide range of fabrics, styles and colours that balance function and design across all of our window treatment systems.

We include fabrics with special functions, acoustic performance, superior light management and environmental considerations. With such a wide choice, you can be sure to find the perfect fabric for your needs.

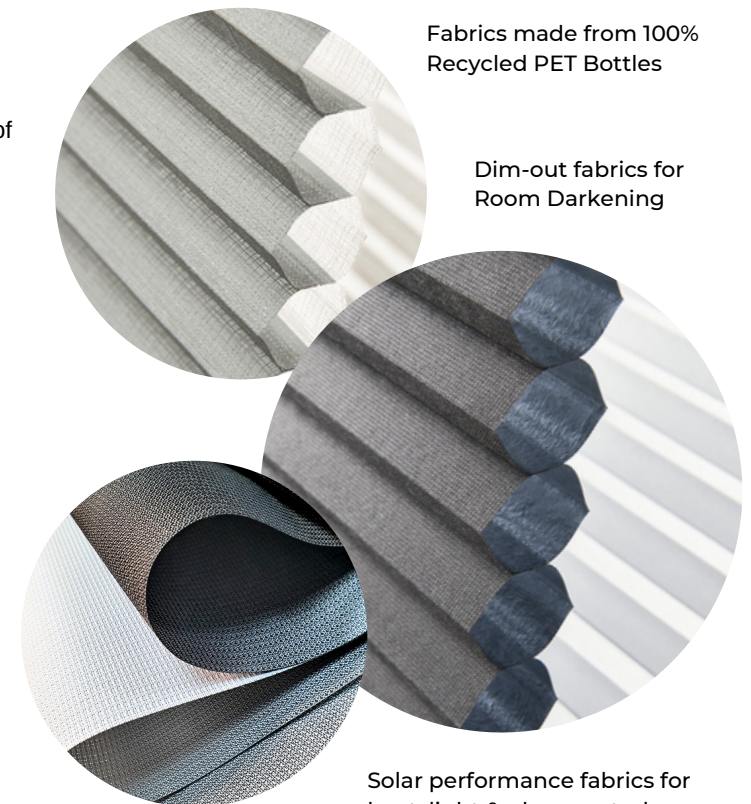

The Ultrasound Blinds Collection

Our extensive range of interior shading offers ten product style selections. Available in a wide range of materials, finishes and customisation, allowing you to choose the one that best fits your décor and enhances the design of your space.

Fabrics made from 100%
Recycled PET Bottles
