COLLECTION

Peace of Mind

Enhance Decor

- For over 25 years we have sourced our materials from the best suppliers globally, guaranteeing you with the highest quality shade solutions worldwide. Safety and sustainability is our priority.
- Aluminium slats suit minimalist interior spaces and wood creates warmth and a sense of luxury. Our collection provides design creativity and inspiration with our extensive range of products.

Comfort Zone

Integrate Seamlessly

- Venetian blind systems offer the ultimate control over light and glare in domestic and professional environments with a smooth and quiet operation.
- Framed solutions are engineered to provide cohesive shading across the Venetian style range, we provide harmony throughout your home or workplace with unique configurations.

THE ULTRASOUND BLINDS ADVANTAGES

RELIABLE IN-HOUSE MANUFACTURING

Our premium systems feature the highest quality components that have been extensively tested to ensure consistent ease of use, even with the largest sizes. Every system is made-to-measure by a team of experienced specialists to guarantee perfect functionality, day after day.

YOUR CHOICE FUNCTION & STYLE

Our Venetian blind systems offer scope for your own designs with a choice of operating possibilities and custom styling options. For the ultimate colour co-ordination, all of our Venetian blind systems are engineered with colour-matching hardware for a premium finish.

DISCRETE YET EFFECTIVE SHADING

We offer the most comprehensive, technically advanced Venetian blind systems for domestic and commercial applications. Favoured for its ability to integrate in to any window and door, with smart features for unique configurations, providing discreet but effective shading.

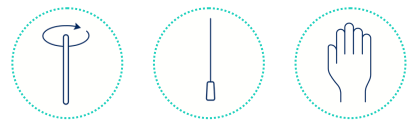

A CUSTOM FIT

Popular in Restaurants, Hotels and domestic applications, Venetian blind shading systems enhance interior design for all situations. Featuring premium quality, colour co-ordinated hardware concealed with a pelmet design, smooth operation and advanced tilt mechanism for high-precision angles. Our bespoke Venetian blind systems are available in extensive range of colours, finishes and decorative options to truly enhance your space.

ENDLESS POSSIBILITIES

Wand Operated Venetian Blind Systems

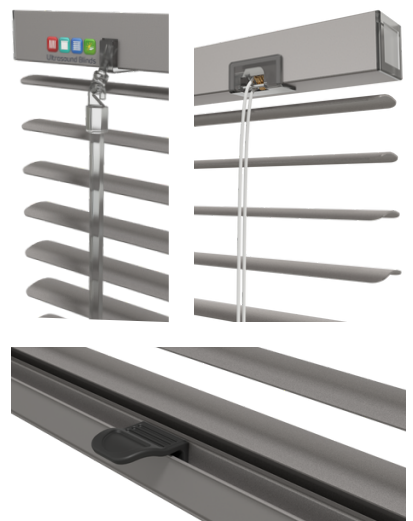

Simple sophistication, timeless quality — our wand-operated Venetian blinds have a cord to raise and lower the blind, and a tilting wand to rotate the slats for flexible light entry. Venetian blind systems are designed to offer a smooth operation so they work effortlessly, even at maximum dimensions. All our Venetian blind systems are child safe and fully comply with BS EN 13120.

Cord Operated Venetian Blind Systems

Cord-operated Venetian blinds present a subtle, yet rich ambiance that gives every blind its own personality. Using the finest materials and ensuring sustainably sourced timber is paramount in presenting nature's true characteristics. Featuring premium quality, colour coordinated hardware concealed with a pelmet design, smooth operation and advanced tilt mechanism for precise angles.

Hand Operated Venetian Blind Systems

This compact Venetian blind system successfully reduces light gaps at the edge of the blind with our sleek aluminium frames, that are expertly colour matched to the window for a seamless finish. Ideal for narrow doors and tilt & turn windows, Patios, Conservatories and Skylights.

FRAMED VENETIAN BLIND SYSTEMS

Ultrasound Blinds bespoke Venetians blinds are built into a specialist Framed unit designed to integrate perfectly onto every window. Hand-operated, the blind is lowered and raised using a grip handle and slats are rotated with a tilting wand for precise light entry. Tensioned systems are suitable for angled windows or free-hanging, with metal or wood 25mm horizontal slats with colour co-ordinated hardware. For enhanced privacy and effective room darkening, our dim-out configuration allows for the tightest slat closure presenting no visible holes when the slats are closed.

The smart features of this blind system provides adaptable fixations to different window and door frames; aluminum, wood or PVC without drilling any holes. Installed directly on to the glass, our Framed system has a wide spectrum of use and is favoured for it's operating abilities on windows that are opened, tilted or closed. This compact Venetian blind system successfully reduces light gaps at the edge of the blind with our sleek aluminium frames, that are expertly colour matched to the window for a discrete finish. Ideal for narrow doors and tilt & turn windows, bi-folding doors, Patios and Conservatories.

UNBEATABLE HARDWARE

The Ultrasound Blinds cord-lock mechanism features unrivalled smooth, fast movement and conveniently stops at any position with a soft stop function. The precise operation of Venetian blind systems offer a practical and flexible shading solution without compromising style. The slats can be finely adjusted to manage the light, glare and heat in any room.

Premium colour matching headrail, bottom rail, ladders, cords, pelmet and tassel are supplied with all Venetian blind systems for an elegant finish.

EFFICIENT & QUIET

At the touch of a button you can raise, lower and tilt your Venetian blinds, especially convenient for blinds in hard to reach places. Inherently child safe with no operating cords, Ultrasound Blinds motorised shading system offers enhanced protection providing automatic shading during periods of sunshine and improved security with timers for simulated presence while the home is unoccupied.

ELECTRIC VENETIAN BLIND SYSTEMS

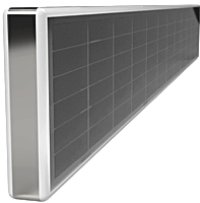

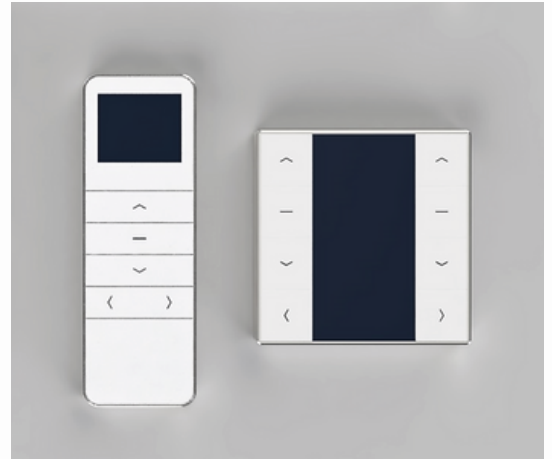

MORE > LESS
AUTOMATIC WINDOW SHADING

UB WVB-E / UB MVB-E

Our motorised Venetian blinds are compatible with all major control system providers, working seamlessly alongside other services and devices to deliver the perfect connected home experience. Alternatively, the optional More>Less App offers the convenience of operating your blinds from your tablet or smartphone, wherever you are.

Featuring virtually silent operation and programmable intermediate soft stops. Our wide range of systems accommodates all blind sizes, fabric weight and preferred control methods. In some situations, where hard wiring to a window is not possible, Ultrasound Blinds battery-operated blinds are wireless and ideal for a retro-fit solution.

"Hi Google,
close my blinds"

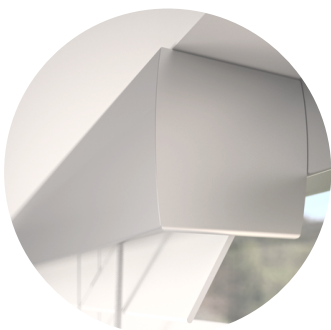

THE PERFECT FINISH

DECORATIVE LADDER TAPES

Unique selection of weave and embossed design tapes to conceal the blind cord ladders for a stunning finish with a contemporary collection of colours and styles.

OPERATING CORD TASSELS

Colour co-ordinating cone tassels are supplied with all Venetian blind systems. Aluminium cylinder tassels create stunning finishing details, available in 7 colours: White, Brass, Chrome, Black, Brushed Aluminium, Anthracite, Copper.

HEADRAIL VALANCE

A colour matching pelmet and return ends conceal the headrail and a premium valance option adds a stylish finish for the ultimate hardware concealment.

WOODEN SLAT STAINED ENDS

Customers can choose to have the ends of their wood slats stained.

Aluminium collection presents a kaleidoscope of colours and a vast array of textures and designs for minimalist interiors

Faux wood PVC collection emulates a sophisticated wood grain or a contemporary smooth appearance.

Hardwood timber and each species of wood presents its own distinctive allure and grain for an exotic finish.

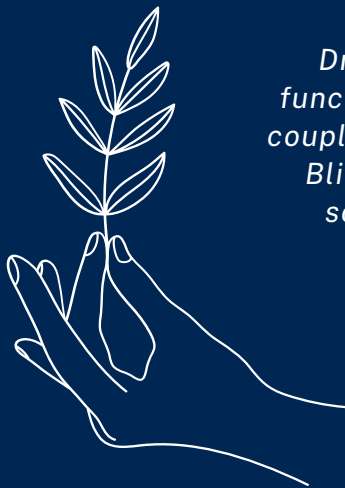

THE ULTRASOUND BLINDS COLLECTION

Our Venetian slat collection sets itself apart by considering both the appearance and technical features of design with superior light management and environmental considerations. We offer a wide range of materials, styles and colours that balance function and design across all of our window treatment systems. All of our shading systems offer superior light management and environmental considerations and have been extensively tested to ensure consistent behaviour in applications such as Kitchens or Bathroom areas with high moisture. With such a wide choice, you can be sure to find the perfect solution for your needs.

Ultrasound Blinds is a major supplier of high-quality interior window treatment systems.

Our advanced technology and daily commitment to perfection enables us to develop and manufacture bespoke systems for solar shading. Together with More>Less by Ultrasound Blinds, our systems offer the most convenient operation and high performance possible.

Driven by customer needs, Ultrasound Blinds offers functional and durable products, expert technical advice coupled with installation and support services. Ultrasound Blinds stands for innovative, sustainable, tailor made solutions, exceptional design and superior quality.
